

International Symposium on Drylands Ecology and Human Security (ISDEHS)

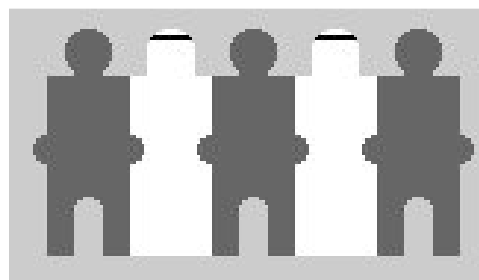

*Regional Perspectives, Policy Responses and Sustainable Development in the Arab Region -
Challenges and Opportunities*

Dubai, December 4-7, 2006

Thematic Session:

The New Approaches in the Management and Modeling of Water Resources and Water Ecosystems in Drylands

Session Convenors:

Dr. Trahel Vardanian

Associate Professor
Department of Physical Geography
Yerevan State University,
1, Alek Manoukian Street, Yerevan,
375025, Republic of Armenia
email: Vardanian@isdehs.com

Christina Hakopian

Lecturer
Department of Physical Geography,
Yerevan State University,
1, Alek Manoukian Street, Yerevan,
375025, Republic of Armenia

Co-Organized by:

International Scientific-Research Centre on Water, Climate and Recreational Resources

The rational use and conservation of water resources is one of the crucial issues in the new millennium. Water is one of the three significant strategic resources in the XXI century. Stepping into the new millennium, humanity has brought in new demands for the use of fresh water. However, the global changes of environment and the rapid development of world economy have exposed a variety of new issues related to the satisfaction of daily growing fresh water demand as well as the conservation of the ecological condition of fresh water.

Thus, in this millennium new methods and techniques of calculation for the re-registration, re-evaluation, management and ecological risk evaluation should be developed.

Please send your abstracts and questions to Dr. Trahel Vardanian
Vardanian@isdehs.com

Please note that the deadline for submitting your abstract is October 15, 2006.
